GOOD NEWS TO ALL MUSLIMS

GOD SENDS NEW OVERWHELMING MIRACLE GUARANTEED TO CONVERT THE WHOLE WORLD

A NEW Quranic miracle has been discovered that is guaranteed to convince the whole world, sooner or later, that the Quran is God's message to the world. In accordance with 41:53, the Quran's 19-based mathematical miracle has been snowballing. With this report, the miracle has become irresistibly overwhelming.

This is to report an awesome Quranic discovery by Brother Feroz Karmally of Vancouver, B.C., Canada.

In a previous issue of the MUSLIM PERSPECTIVE, I reported the fantastic discovery by Brother Abdullah Arik; a discovery that proves that every single verse is divinely fixed far beyond the abilities of all the humans and all the jinns combined.

Here is Arik's discovery once more: If you write down the number of every verse in the Quran, preceded by the number of verses in each sura, you end up with a very long number consisting of 12692 digits. For example, Sura 1 consists of 7 verses. So you write down 7, followed by the number of every constituent verse in this sura. Thus, the number representing Sura Al-Faatchah will look like this: 71234567.

Sura 2, Al-Baqarah (The Heifer) consists of 286 verses. Therefore, the number representing Sura 2 will look like this: 286123456.....285286.

The number that covers Suras 1 and 2 will look like this: 71234567286123456.....285286.

After you carry out this process for all suras, you end up with a very long number consisting of 12692, or 19x668, digits.

The number itself, which will take hundreds of pages to write down, is a multiple of 19. Any person with a computer can verify this miraculous physical fact. The computer program is very easy; it takes one number at a time, divides it by 19, then carries the remainder to the next number, and so on. For example, the first numbers in the 12692-digit complete number are: 71234567286123456..... The program takes 7, finds that it is not divisible by 19, so it takes 71, finds that it equals $19 \times 3 + 14$. The computer then puts 14 next to the 2, divides 142 by 19, and so on to the end of the Quran.

Feroze Karmally was demonstrating this awesome miracle to a friend, using his computer. In the process of showing his friend, he got an idea. Why not put the number of verses in each sura at the end of the list of verse numbers? Thus, the data for Sura 1 will be 12345677 instead of 71234567.

April 7: The First Day of Ramadan
May 5: The Last Day of Fasting

Congratulations. Fasting is decreed during Ramadan from dawn (2 hours before sunrise) until sunset.

New Revelation

How Many Years

From Revelation of the Quran *to* **Revelation of the Quran's Miracle**

I started to work on the mathematical composition of the Quran in 1968. I put the Quran into the computer in 1969 and 1970. The first results were published in Ramadan 1393 (October 1973) in my book entitled **MIRACLE OF THE QURAN: SIGNIFICANCE OF THE MYSTERIOUS ALPHABETS**, Islamic Productions, St. Louis, Missouri. Although the number 19 was everywhere throughout the data and the computer printouts, it was not the will of Almighty God to reveal it at that time. Thus, the book reported only that the Quranic Initials occurred in their chapters at the highest proportion, compared to other alphabets. In other words, Sura "Q" (Qaaf) (No. 50) contained the highest proportion of the letter "Q" (Qaaf). Sura "S" (Saad) (No. 38) contained the highest proportion of the letter "S" (Saad).

This phenomenon was found to be true with all initialed sura, except for Sura Ya Seen (No. 36); it was exactly the opposite—it contained the smallest proportion of the letters "Y" (Yaa) and "S" (Seen). I thought that was the whole significance of the Quranic Initials.

Further examination of the data led to the great discovery that the Quranic Initials, without a single exception, occur in their chapters in multiples of 19. The number 19 became a reality as the Quran's secret code in January 1974. An avalanche of miraculous phenomena followed.

It was God's will to unveil this great miracle in January 1974 AD, Zul-Hijjah 1393 AH.

1393 is the Hijra date. The Quran was revealed 13 years before Hijra. Thus, the Quran's miracle was revealed $1393 + 13 = 1406$ years after revelation of the Quran.

*1406 = 19x74. The AD year was 1974,
and Sura 74 is where 19 is reported.*

Very simple facts became so obvious that it was clearly a divine plan to keep them hidden for 1400 years. Examples of these very simple facts are:

- (1) (Basmalah) (1:1) consists of 19 Arabic letters.
- (2) The Quran consists of 114 suras, 19×6 .
- (3) Every word in Basmalah occurs in the Quran in multiples of 19.
- (4) The first revelation (96:1-5) consisted of 19 words, and 76 letters (19×4).
- (5) The first chronological sura (Sura 96) is placed atop the last 19 suras, and consists of 19 verses, and 304 letters (19×16).
- (6) The missing Basmalah (Sura 9) is compensated for 19 suras later, in 27:30.

The data for Sura 2 will be 123456.....286286 instead of 286123456.....286, and so on. When you come to the last sura, the data will be 1234566 instead of 6123456.

Since we are placing the number of verses in each sura at the end of the list of verse numbers in that sura, when we come to the end of the Quran we must write down the total number of verses in the Quran, which is 6234.

This means that the final number will look like this: 12345677123456789.....12345666234. The first 8 numbers (12345677) are the numbers of verses in Sura 1, followed by 7, the number of verses in the sura. The number then continues into Sura 2, following the same system, and so on till the end of the Quran.

The last 11 digits (12345666234) in the big number are the verse numbers of Sura 114, followed by the number of verses in Sura 114, followed by 6234, the total number of verses in the whole Quran.

The final number, therefore, consists of 12696 digits. This huge number, about one Kilometer long, is a multiple of 19.

Summary

What we see here is an awesome miracle that is guaranteed to convince the whole world, sooner or later, that the Quran is God's message to the world. Here is a summary of the two miracles discovered by Abdullah Arik and Feroze Karmally:

(1) Arik: If you write down the number of verses in every sura, followed by the number of each verse, all the way to the end of the Quran, you will end up with a very long number consisting of 12692 digits. This very long number looks like this:

7123456728612345.....6123456.

Both the number of digits (12692) and the very long number itself are divisible by 19.

(2) Karmally: If you reverse the system and write down the number of each verse in every sura, followed by the number of verses in the sura, and do this all the way to the end of the Quran, you must then place the total number of verses in the whole Quran at the end of this very long number. You will finally have a number consisting of 12696 digits and looking like this:

1234567712345.....12345666234.

This very very long number is a multiple of 19.

The massive computer printouts for all these numbers—the numbers are so huge, no one can name them—can be viewed at Masjid Tucson.

As mentioned above, the computer program that handles these numbers is very simple, and we will be glad to send it to anyone who asks for it.

It is noteworthy that the individuals who had trouble with the counts of letters in the Quran, will no longer have any difficulty appreciating the fact that God's miracle in the Quran is "One of the greatest miracles" (74:30-35). As shown here, and in the past issues of M.P., the numbers of suras and verses, not the letters, constitute an awesome miracle in its own right.

For the readers who missed some of the profound phenomena connected with this incredible miracle, here is a quick and condensed update. The full details are found in Appendix 1 of my new translation: QURAN: THE FINAL TESTAMENT, Islamic Productions, 1989:

1. The word "Allah" (God) occurs in the Quran 2698 times, 19×142 .

2. Take all the verses wherever you see the word "Allah." Add up the numbers of these verses; the total is 118123, 19×6217 .

3. "The Quran" occurs in the Quran 57 times (19×3), in 38 suras (19×2), and if you add the verse numbers wherever you see "The Quran" the total comes to 2660 (19×140).

4. If you add the total of verse numbers where "The Quran" is found (2660), plus the number of suras where "The Quran" is found (38), you get 2698, exactly the number of the word "Allah" in the Quran.

5. The Quran's message is "Worship God ALONE." The word "ALONE" (in Arabic 'Wahdahu') occurs in reference to God in 7:70, 39:45, 40:12 & 84, and 60:4 (see the famous INDEX TO THE WORDS OF QURAN, Page 745). If you add these numbers, you get 361, 19×19 .

6. The Quranic initials (such as A.L.M.) that prefix 29 suras occur in their suras in multiples of 19, without a single exception.

7. The numbers mentioned in the Quran are 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 19, 20, 30, 40, 50, 60, 70, 80, 99, 100, 200, 300, 1000, 2000, 3000, 5000, 50000, and 100000. The sum of these numbers is 162146, 19×8534 .

This is only a tiny sample from this extremely vast miracle. It takes no less than divine intervention to prevent any reader from falling prostrate before the Almighty Author of the Quran and fully appreciate God's assertions that this 19-based miracle is indeed:

"One of the greatest Miracles" (74:30-35).

Keep up with the most exciting events.
Annual Subscription: \$19.00 world-wide

4th INTERNATIONAL CONFERENCE OF THE UNITED ISLAMIC NATION Sep. 1, 2, 3, 1989, IN SHAA ALLAH.

Yes, once again it is the happy annual occasion when believers from all over the world get together to update their information.

As usual, attendance will be by invitation only. To help us organize a successful conference—and God has always been generous and gracious towards us—please let us know of your plans as soon as you know.

The fees are: \$76.00/individual, \$114.00/couple, children are free. Due to space limitations, send your reservations and/or your conference fees as soon as possible.

The children will be taken care of by God through competent baby sitters.

CALL FOR PAPERS

Anyone who wishes to address the conference, please sit down and write your ideas. Please send your talk at the earliest possible chance, so we can include your title in the program. The final program will be printed in the July issue of M.P. IN SHAA ALLAH.

The papers delivered at the last conference were excellent. This year, IN SHAA ALLAH, let us keep them just as excellent.

The Dawn Prayer: Your Indicator

1. If you are not doing the Dawn Prayer every morning before sunrise, your soul is too weak to force your body to wake up and worship your Creator. Your soul is starving, weak, and shrunken. You have been feeding and caring for your outer garment, the body, while neglecting yourself.
2. If you are doing the Dawn Prayer grudgingly, your soul is growing; you're on your way.
3. If you are eagerly and joyfully observing the Dawn Prayer, congratulations. You have a strong, well developed soul, and the soul is you, the real person.

We still have a good supply of the booklet detailing the historical crime that led to the assassination of Khalifa 'Uthman, the installation of Ali as the fourth Khalifa, the assassination of Ali, followed by 50 years of bitter war, culminating in the martyrdom of Hussein and the massacre of the Prophet's family. Ask for: "TWO FALSE VERSES DISCOVERED IN THE QURAN," 40 pages, 71 great miracles proving that 9:128-129 do not belong in the Quran. \$3.00
